

SQ-s

ZenPro™

SQ-s 1.0

SQ-s 1.1

SQ-s. Is minimalist.

In its most stripped-down definition, minimalism is about going for only the most essential and getting rid of the excesses in favor of optimising the efficiency of a workspace. Most design experts are seeing this as a growing trend, especially in Asia, as a result of employers are keen on nurturing collaboration rather than individual performance.

Minimalist design works. The style is so simple that users using it akin to breathing. Thus, giving workers optimal mental focuses on the work, and a chance to appreciate what's around us.

SQ-s 1.2

SQ-s 2.0 Teaming high desk

This desk is a solution to group work that combines sitting and standing at one time. In line with creating a healthier work environment, the standing option encourages our body to do spontaneous postural change without us being aware. Frequent changes of posture could lead to a healthier positive effect on health, thus increasing employee's health, comfort, and productivity.

SQ-s 2.1 Teaming high desk

Ergonomically innovates.

Adding on a foot platform can boost this high desk with an ergonomic value. When user's legs are raised at about 90°, the pressure to the underthighs could be lifted during a prolonged sitting session. At the same time, a flat-resting feet on the platform makes it feeling exactly like resting your feet on the floor. When the whole legs are ergonomically resting the whole time while seated, less stress is transferred to user's lower back, thus helps to promote longer use time at this desk.

SQ-s 3.0

In collaboration

As a versatile modular system, it can be *benched* to support both individual and teamworking.

SQ-s 3.1

Improving functionality and optimising workspaces are the key to the success of using any furniture system in most Asian work cultures.

SQ-s fulfils all standard office requirements by complementing the system easily with the all-time favorites : modesty panels (a top need in Asian offices with female workers), pedestal storages, cushioned mobile pedestal storages (doubled as a quick discussion stopover), functional screen and more.

Instal a Zenpro *TROJAN* cabinet to create a private *island* workspace as well as promote optimal storing organisation skill.

SQ-s 3.2

This system is flexible enough to be expanded to meet the needs of team-grouping yet retaining its consistent design aesthetic.

SQ-s 3.3

Enjoy the view. Enjoy your company of your co-workers. 120° is designed to extend work spaces to the maximum more effectively and aesthetically than the straight or L configuration. On top of that, SQ-s does it with style.

SQ-s 3.4

The light and simplistic design of the modular structure supports the changing needs from team collaboration to individual work spaces and vice versa. Space-efficient environments can be re-created and maximised by applying the SQ-s plug-and-match functional screen that come in various choices.

Magazine/book box

Plant box

Fabric screen

Frosted glass/acrylic screen

Whiteboard screen

Fabric screen with accessory rail

Divider screen (fabric)
